CAREER OBJECTIVE

Detail-oriented Computer Science student at Rensselaer Polytechnic Institute with minors in Graphic Design and Electronic Arts. Seeking a position at a print shop where I can design eye-catching graphics for t-shirts, business cards, and other custom products while using my technical skills to prepare print-ready files and keep production running smoothly.

EDUCATION

Rensselaer Polytechnic Institute, Troy, NY | 2026
Pursuing Bachelors in Computer Science, Minors in Graphic Design and Electronic Arts
Courses: Life in Color *(color theory)*, Introduction to Graphic Design, Information Design

Stuyvesant High School, Manhattan, NY

EXPERIENCE

Google Software Engineering Program (G-SWEP), *Participant* 03/2024 – 09/2024

- Participated in two 10-week mentorship programs with Google Software Engineers to enhance knowledge and practical skills in data structures and algorithms.
- Strengthened problem-solving skills through weekly coding sessions.

Developed a personal brand identity in Adobe Illustrator, sketching 70+ logo concepts across monograms, wordmarks, and symbols before refining six into polished vector comps. Applied typography skills to craft custom lockups with precise kerning, tracking, and proportion, then prepared production-ready files and a printed cardstock business card. Used information design and visual hierarchy to transform the history of the Prague Astronomical Clock into an infographic poster featuring a moon-phase timeline. Adapted the poster into a mobile app prototype in Figma, restructuring the content and layout to be accessible for small screens.

Aplus Academy LLC, *Part-Time Internship* 08/2021 – 08/2022

- Utilized Excel to track student performance and manage operational data across multiple locations.
- Tutored students in English and Math, supporting academic improvement.

SKILLS

Illustration: Adobe Illustrator, Procreate, Figma || *design iteration and critique, typography and kerning, vector illustration*
Layout: Adobe InDesign, Adobe Acrobat Pro || *print-ready file preparation*
Photo Editing: Adobe Photoshop
Coding: Java, Python, JavaScript, HTML/CSS, Git, Visual Studio Code
